Results from PALISI network collaborations have been published in several major journals, including Critical Care Medicine, JAMA, New England Journal of Medicine, Transfusion, Pediatric Critical Care Medicine, and Annals of Surgery.
Effect of mechanical ventilator weaning protocols on respiratory outcomes in infants and children: a randomized controlled trial.

Journal of the American Medical Association November 2002 288(20):2561-8

The feasibility of conducting clinical trials in infants and children with acute respiratory failure.

Randolph AG, Meert KL, O'Neil ME, Hanson JH, Luckett PM, Arnold JH, Gedeit RG, Cox PN, Roberts JS, Venkataraman ST, Forbes PW, Cheifetz IM; Pediatric Acute Lung Injury and Sepsis Investigators Network.

American Journal of Respiratory and Critical Care Medicine May 2003 167(10):1334-40

Effect of exogenous surfactant (calfactant) in pediatric acute lung injury: a randomized controlled trial.

Willson DF, Thomas NJ, Markovitz BP, Bauman LA, DiCarlo JV, Pon S, Jacobs BR, Jefferson LS, Conaway MR, Egan EA; Pediatric Acute Lung Injury and Sepsis Investigators

Journal of the American Medical Association January 2005 293(4):470-6

Effect of prone positioning on clinical outcomes in children with acute lung injury: a randomized controlled trial.

International pediatric sepsis consensus conference: definitions for sepsis and organ dysfunction in pediatrics.

Goldstein B, Giroir B, Randolph A; International Consensus Conference on Pediatric Sepsis.

Pediatric Critical Care Medicine January 2005 6(1):2-8
Factors influencing predisposition to sepsis in children with cancers and acquired immunodeficiencies unrelated to human immunodeficiency virus infection.

Allen UD.  
*Pediatric Critical Care Medicine*  
May 2005  
6(3 Suppl):S80-6  
PMID: 15857564 DOI: 10.1097/01.PCC.0000161949.08227.CE  

Pediatric sepsis definitions: past, present, and future.

Brilli RJ, Goldstein B.  
*Pediatric Critical Care Medicine*  
May 2005  
6(3 Suppl):S6-8  
PMID: 15857561 DOI: 10.1097/01.PCC.0000161585.48182.69  

Reducing the global burden of sepsis in infants and children: a clinical practice research agenda.

Carcillo JA.  
*Pediatric Critical Care Medicine*  
May 2005  
6(3 Suppl):S157-64  
PMID: 15857551 DOI: 10.1097/01.PCC.0000161574.36857.CA  

Alternative outcome measures for pediatric clinical sepsis trials.

Curley MA, Zimmerman JJ.  
*Pediatric Critical Care Medicine*  
May 2005  
6(3 Suppl):S150-6  
PMID: 15857550 DOI: 10.1097/01.PCC.0000161582.63265.B6  

Genetic polymorphisms in sepsis.

Dahmer MK, Randolph A, Vitali S, Quasney MW.  
*Pediatric Critical Care Medicine*  
May 2005  
6(3 Suppl):S61-73  
PMID: 15857562 DOI: 10.1097/01.PCC.0000161970.44470.C7  

What have we learned from observational studies on neonatal sepsis?

Escobar GJ.  
*Pediatric Critical Care Medicine*  
May 2005  
6(3 Suppl):S138-45  
PMID: 15857547 DOI: 10.1097/01.PCC.0000161586.06575.78

Survey of pharmacologic thromboprophylaxis in critically ill children.

Faustino EV, Patel S, Thiagarajan RR, Cook DJ, Northrup V, Randolph AG.

Critical Care Medicine July 2011 39(7):1773-8
PMID: 21423003 PMCID: PMC3118917 DOI: 10.1097/CCM.0b013e3182186ec0 https://www.ncbi.nlm.nih.gov/pubmed/21423003

Children with single-ventricle physiology do not benefit from higher hemoglobin levels post cavopulmonary connection: results of a prospective, randomized, controlled trial of a restrictive versus liberal red-cell transfusion strategy.

Cholette JM, Rubenstein JS, Alfieris GM, Powers KS, Eaton M, Lerner NB.

Red blood cell transfusion thresholds in pediatric patients with sepsis.

Karam O, Tucci M, Ducruet T, Hume HA, Lacroix J, Gauvin F; Canadian Critical Care Trials Group; PALISI Network.

Critically ill children during the 2009-2010 influenza pandemic in the United States.

[Clinical impact of length of storage before red blood cell transfusion].

Lacroix J, Tucci M

Transfusion April 2011 18(2):97-105
Comparison of SpO2 to PaO2 based markers of lung disease severity for children with acute lung injury.

*Critical Care Medicine* April 2012 40(4):1309-16

PMID: 22202709 DOI: 10.1097/CCM.0b013e31823bc61b

PMID: 22511131 PMCID: PMC3653183 DOI: 10.1097/CCM.0b013e3182416f23

*Critical Care Medicine* October 2012 40(10):2883-9

PMID: 22824936 PMCID: PMC3455114 DOI: 10.1097/CCM.0b013e31825bc54d

Characterization of tracheal intubation process of care and safety outcomes in a tertiary pediatric intensive care unit.

*Pediatric Critical Care Medicine* January 2012 13(1):e5-10

PMID: 21057359 DOI: 10.1097/PCC.0b013e3181fe472d

Identifying factors to minimize phlebotomy-induced blood loss in the pediatric intensive care unit.

Valentine SL, Bateman ST.

*Pediatric Critical Care Medicine* January 2012 13(1):22-7

PMID: 21499175 DOI: 10.1097/PCC.0b013e318219681d
Washing red blood cells and platelets transfused in cardiac surgery reduces postoperative inflammation and number of transfusions: results of a prospective, randomized, controlled clinical trial.

A pilot, randomized, controlled clinical trial of lucinactant, a peptide-containing synthetic surfactant, in infants with acute hypoxemic respiratory failure.

Immunosuppressive effects of red blood cells on monocytes are related to both storage time and storage solution.

Muszynski J, Nateri J, Nicol K, Greathouse K, Hanson L, Hall M.

*Transfusion* April 2012 52(4):794-802

Transfusion-related Epstein-Barr virus infection among stem cell transplant recipients: a retrospective cohort study in children.

Trottier H, Buteau C, Robitaille N, Duval M, Tucci M, Lacroix J, Alfieri C.

*Transfusion* December 2012 52(12):2653-63

A National Emergency Airway Registry for children: landscape of tracheal intubation in 15 PICUs.

Critical Care Medicine  
March 2013  
41(3):874-85  
PMID: 23328260 DOI: 10.1097/CCM.0b013e3182746736  

Defining sedation-related adverse events in the pediatric intensive care unit.

Grant MJ, Balas MC, Curley MA; RESTORE Investigative Team.

Heart & Lung  
May 2013  
42(3):171-6  
PMID: 23643411 PMCID: PMC3641854 DOI: 10.1016/j.hrtlng.2013.02.004  

Incidence and acute complications of asymptomatic central venous catheter-related deep venous thrombosis in critically ill children.

Journal of Pediatrics  
February 2013  
162(2):387-91  
PMID: 22883418 PMCID: PMC3575007 DOI: 10.1016/j.jpeds.2012.06.059  
https://www.ncbi.nlm.nih.gov/pubmed/22883418

Transfusion of cell saver salvaged blood in neonates and infants undergoing open heart surgery significantly reduces RBC and coagulant product transfusions and donor exposures: results of a prospective, randomized, clinical trial.

Cholette JM, Powers KS, Alfieris GM, Angona R, Henrichs KF, Masel D, Swartz MF, Daugherty LE, Belmont K, Blumberg N.

Pediatric Critical Care Medicine  
February 2013  
14(2):137-47
